

GUIDE TO THE OCCUPATION MATRIX

How do I use the Matrix?

Employment and training decisions should be made after consideration of all relevant issues, including aptitude, interests, expectations about pay and working conditions, training requirements and goals.

The *Occupation Matrix* includes summary statistical information for around 350 occupations, which can provide useful background, but it needs to be read in conjunction with other occupational resources. Titles in the *Occupation Matrix* have been grouped into broad categories based on field of work to assist users to better explore the labour market. There are 23 groupings.

- Accounting, Banking and Financial Services
- Administration and Human Resources
- Advertising, Media and Public Relations
- Agriculture, Animal and Horticulture
- Arts and Entertainment
- Automotive
- Construction, Architecture and Design
- Education and Training
- Electrical and Electronics
- Engineers and Engineering Trades
- Executive and General Management
- Government, Defence and Protective Services
- Health and Community Services
- Hospitality, Food Services and Tourism
- Information and Communication Technology (ICT)
- Legal and Insurance
- Manufacturing
- Mining and Energy
- Personal Services
- Sales, Retail, Wholesale and Real Estate
- Science
- Sport and Recreation
- Transport and Logistics

Some titles appear in more than one category.

The relevant occupation major group is listed in brackets after each occupation title. These refer to the groups on pages 25 to 30 of the Australian Jobs publication.

Key	Occupation
M	Managers
P	Professionals
TT	Technicians and Trades Workers
CP	Community and Personal Service Workers
CA	Clerical and Administrative Workers
SW	Sales Workers
MO	Machinery Operators and Drivers
L	Labourers

Employment and Employment Change

The employment information gives the total number of people employed in the occupation at November 2016. It includes both full-time and part-time workers.

Employment change refers to the increase or decrease in employment, as well as the percentage change, over the five years to November 2016.

Data Source: ABS, Labour Force, Department of Employment trend

Unemployment Rate

The unemployment rate is the number of unemployed persons as a percentage of the labour force (employed plus unemployed). The unemployment rate is presented in three categories: below average, average and above average. These categories are based on the occupation's average unemployment rate over 2016 relative to the average across all occupations. Occupational unemployment rates do not reflect underutilised skills (such as an Accountant working as an Accounting Clerk).

The occupational unemployment rate may be lower than the published national unemployment rate as it does not include job seekers who have never worked and those who have not worked full-time or part-time in the past two years.

Data Source: ABS, Labour Force, annual averages of original data

Working Part-time

This column shows the proportion of workers in the occupation who work part-time. The information uses the ABS definition of part-time, which is working less than 35 hours per week.

Data Source: ABS, Labour Force, annual averages of original data

Female

This shows the proportion of those employed in the occupation who are female.

Data Source: ABS, Labour Force, annual averages of original data

Median Age

The median age is expressed in years for all workers (part-time and full-time). Half the workers are younger than this age and half are older.

Data Source: ABS, Labour Force, annual averages of original data

Median Earnings

Median weekly earnings are before tax and are for full-time workers. The median earnings ranges are for all ages and levels of experience. They are indicative only and should not be used to determine what a worker will actually earn. Data are not available for all occupations.

Key	Median Weekly Earnings
\$	≤ \$950
\$\$	\$951 to \$1,100
\$\$\$	\$1,101 to \$1,350
\$\$\$\$	\$1,351 to \$1,650
\$\$\$\$\$	> \$1,650

Data Source: ABS, Characteristics of Employment, 2015

No Post-school Qualification

The figures are a percentage of those employed in the occupation (15 to 64 years) who have not completed education other than pre-primary, primary or secondary education. Data are not available for all occupations.
