Introduction

Welcome to the 2020 edition of Australian Jobs. This publication provides an overview of trends in the Australian labour market to support job seekers and employment service providers, career advisers, those considering future training and work and people interested in labour market issues.

How to use Australian Jobs

Australians Jobs 2020 is designed to step you through all aspects of the labour market. The COVID-19 pandemic has had significant impact on the labour market and there is now more competition for jobs. It is more important than ever to understand what employers are looking for and understanding the labour market that you are moving into.

The first three sections are an overview of Australia’s diverse labour market, providing analysis and outlining opportunities across industries, occupations and locations.

The second half of the publication provides a step-by-step guide on how to secure a job. From where vacancies are located, to what employers are looking for, demonstrating how formal education can help you achieve career goals and outlining what government programs are available to assist you.

It is important to remember that the labour market can change quickly. It isn’t easy to forecast future labour market conditions and it isn’t recommended to base employment and training decisions solely on predicted shortages. It is far better to train in an area in which you have an interest and aptitude than choosing a career solely based on expectations about future conditions.

Sometimes, though, while occupations can be in high demand, job seekers can still face significant competition for positions. On the other hand, employers sometimes have difficulty recruiting for occupations which are not growing very much or are even in decline.

More detailed information is available

The analysis in this publication provides an introduction and overview to some of the factors which can be considered in understanding employment conditions and the changes which are occurring in the labour market. Links to websites that offer additional information are also provided, including:

- National Skills Commission (nationalskillscommission.gov.au)
- Labour Market Information Portal (lmip.gov.au)

There is a range of Government assistance available to help you get workplace experience, gain skills through education and training, and find the right job. More information about the assistance available is provided on page 39 and on the Department of Education, Skills and Employment’s website at dese.gov.au.

Inquiries about Australian Jobs should be directed to australianjobs@skillscommission.gov.au.

The contents of Australian Jobs 2020 are based on information available at the time of publication. Over time, the reliability of the data and analysis may diminish. The Commonwealth, its officers, employees and agents do not accept responsibility for any inaccuracies contained in the report or for any negligence in the compilation of the report and disclaim liability for any loss suffered by any person arising from the use of this report. Labour market information must be used cautiously as employment prospects can change over time and vary by region. It is important in making and assessing career choices to consider all factors, including interest and aptitudes, remuneration and expectations, and the requirements of occupations.
Where We Are Now

A time of major change

COVID-19 has radically affected Australia's labour market.

With the onset of COVID-19 in March 2020 (when Australia recorded its 100th case and just prior to the shutdown of non-essential services and trading restrictions), there was an unprecedented fall in employment, record numbers of people left the job market and, for those who remained looking for work, vacancies fell to their lowest level in more than a decade.

Thousands of jobs were lost and the lives of many Australians altered greatly. Nonetheless, Australia is performing better than most other nations in terms of its economic resilience.

Most labour market indicators (such as employment and the unemployment rate) are now improving since the low in May 2020, buoyed by the decline in coronavirus cases and the subsequent easing of restrictions. Encouragingly, employment for women and youth, who were initially affected the most, is rebounding quite strongly, although for both cohorts employment remains below pre-COVID levels.

To help with the recovery process, the National Skills Commission (NSC) has developed a range of information, resources and tools to support job seekers during this unprecedented time (one of which you are currently reading!). Another has been to identify occupations that have remained resilient despite the broader impact of COVID-19.

What is a resilient occupation?

The NSC considers an occupation to be resilient if it has positive employment growth prospects as Australia’s labour market recovers from the impacts of COVID-19. Taking projected employment growth data from before the pandemic, changes to job vacancies and employment at the peak of the pandemic, and indications of an occupation’s recovery in job vacancies, the NSC has been able to create a list of resilient occupations.

Resilient occupations are most likely to occur in the following occupational groups

- Professionals (for example, Speech Professionals and Audiologists, Other Medical Practitioners and Midwives)
- Community and Personal Service Workers (Aged and Disabled Carers and Security Officers and Guards)
- Machinery Operators and Drivers (Agricultural, Forestry and Horticultural Plant Operators and Delivery Drivers).

Most of these occupations are likely to require post-school qualifications, highlighting the importance of undertaking further study after you leave school. More information on these occupations can be found at the Jobs by Occupation section beginning on page 14.

Resilient industries

Looking at the occupations that proved to be the most resilient during the COVID-19 pandemic, the NSC also determined their distribution across industries, with the following showing greater resilience than the national average:

- Health Care and Social Assistance
- Education and Training
- Construction
- Mining
- Transport, Postal and Warehousing
- Administrative and Support Services.

For more information on these industries, see the Jobs by Industry section on page 4. Further details on this research can be found on the NSC website.

Emerging occupations

In response to COVID-19, the need to adapt and learn new skills has arisen quite quickly. For example, manufacturers have learnt new techniques to make unfamiliar, in demand products and restaurant owners have quickly developed or enhanced their skills in e-commerce. Nearly everyone, in nearly every office, has had to learn the awkwardness of asking a person on a teleconference to unmute their microphone.

The NSC has also been identifying these emerging skills and looking at how these skills change existing jobs. By doing so, we have identified emerging or new occupations in the labour market. Examples of these emerging occupations include Social Media Specialists and Wind Turbine Technicians. More information on these emerging occupations can be found on the NSC website.
Jobs by Industry

Australia’s largest employing industries

Health Care and Social Assistance
Accounts for 14% of Australian workers
Top Employing Occupations
1. Registered Nurses
2. Aged and Disabled Carers
3. Child Carers

Retail Trade
Accounts for 10% of Australian workers
Top Employing Occupations
1. General Sales Assistants
2. Retail Managers
3. Checkout Operators and Office Cashiers

Construction
Accounts for 9% of Australian workers
Top Employing Occupations
1. Carpenters and Joiners
2. Electricians
3. Construction Managers

Professional, Scientific and Technical Services
Accounts for 9% of Australian workers
Top Employing Occupations
1. Accountants
2. Software and Applications Programmers
3. Solicitors

Education and Training
Accounts for 9% of Australian workers
Top Employing Occupations
1. Primary School Teachers
2. Secondary School Teachers
3. Education Aides
Health Care and Social Assistance

- 32% regional
- 9% aged 15 to 24 yrs
- 10% self-employed

**Annual Employment Growth (%)**

Health Care and Social Assistance is Australia’s largest employing industry and, given the COVID-19 pandemic, has a critically important workforce. It covers health services like hospitals, General Practitioners, dental and ambulance services, as well as services like child care and aged care.

**Top Employing Occupations**
- Registered Nurses
- Aged and Disabled Carers
- Child Carers
- Nursing Support and Personal Care Workers
- Receptionists

This industry has a large proportion of part-time workers, with 46% of the workforce employed part-time (compared with the Australian average of 31%). There is also a significant share of female workers in Health Care and Social Assistance (nearly four in five workers are female).

Post-school education is commonly required in this industry with more than 80% of workers having a post-school qualification. Qualifications are often mandatory for employment but training opportunities exist in both the higher education and VET sectors.

Demand is expected to continue for this industry, given the COVID-19 pandemic and Australia’s ageing population.

Education and Training

- 32% regional
- 9% aged 15 to 24 yrs
- 7% self-employed

**Annual Employment Growth (%)**

Education and Training is one of Australia’s largest employing industries and includes teaching occupations across all levels of schools, as well as University Lecturers and Tutors. Around 71% of the workforce is female, the second highest percentage for any industry within Australia. Part-time work is also relatively common (around 40% of jobs).

**Top Employing Occupations**
- Primary School Teachers
- Secondary School Teachers
- Education Aides
- University Lecturers and Tutors
- Private Tutors and Teachers

Most people who work in Education and Training have post-school qualifications, with almost two-thirds of workers holding a bachelor degree or higher (the highest of any industry). Reflecting the time taken to gain these qualifications, only 9% of this workforce is aged 15 to 24 years old. While most jobs need a university degree, lower skilled jobs like Education Aides can provide an employment pathway.

In addition, a relatively large share of workers are aged 55 years or older (22%), which suggests retirements will create employment opportunities in this industry over the next decade.

Sources: ABS, Labour Force (seasonally adjusted and annual averages of original data); ABS, Characteristics of Employment; ABS, Education and Work.
Construction is one of Australia’s largest employing industries, with employment opportunities available at all skill and experience levels across the country. The most common entry into this industry is through the completion of an apprenticeship or traineeship, which is reflected in the workforce’s educational attainment (50% of workers possess a certificate III or higher VET qualification).

Just over one in three workers, though, do not possess any post-school qualifications and 16% of the workforce are Labourers which suggests there are some good entry level opportunities. More information on Labourers can be found on page 20.

This industry offers plenty of opportunities for self-employment, and more than one in three workers report being their own boss. For more information on this, please see page 39.

Construction has the lowest percentage of female employment of any industry within Australia (13%).

Manufacturing is a very diverse workforce and covers the manufacture of food and beverages, petroleum and coal, polymer products, machinery, furniture and more.

While it is common for workers to hold a certificate III or higher VET qualification, employers in this industry also value trade experience and practical knowledge. This is shown by the sizeable proportion of workers who do not have post-school qualifications (around 40% of the workforce). While around 100,000 young people are employed in Manufacturing, they represent a relatively small part of this industry (11% are aged 15 to 24 years old).

Employment in this industry is typically full-time (85%).
Professional, Scientific and Technical Services

Employment in this industry is mostly located in capital cities and 64% of jobs are concentrated in New South Wales and Victoria. This is a large and diverse industry and includes legal and accounting services, veterinary services, and computer system design. Employment is mostly located in capital cities and 64% of jobs are concentrated in New South Wales and Victoria.

Top Employing Occupations

- Accountants
- Software and Applications Programmers
- Solicitors
- Management and Organisation Analysts
- Advertising, Public Relations and Sales Managers

This is a highly skilled workforce, with more than 80% holding post-school qualifications. Professionals represent 59% of this industry and more than a quarter are self-employed. For more information on the Professionals occupation group, please see page 16.

A small share of this workforce is young (aged 15 to 24 years old), reflecting the time it takes to attain the required qualifications.

Sources: ABS, Labour Force (seasonally adjusted and annual averages of original data); ABS, Characteristics of Employment; ABS, Education and Work.

Financial and Insurance Services

Employment in the Financial and Insurance Services industry includes banking, insurance and superannuation funds, as well as financial brokering services. Employment is concentrated primarily in capital cities, particularly along Australia’s east coast, with nearly half the workforce located in New South Wales.

Top Employing Occupations

- Bank Workers
- Financial Investment Advisers and Managers
- Financial Brokers
- Insurance, Money Market and Statistical Clerks
- Credit and Loans Officers

This workforce is highly qualified, with 80% holding post-school qualifications (compared with 68% across all industries). Almost all jobs are for Professionals, Clerical and Administrative Workers and Managers.

Reflecting the time it takes to attain the required qualifications, a small share of this workforce is aged 15 to 24 years old (just 6%). That said, Bank Workers is the largest employing occupation within Financial and Insurance Services and this role generally does not require post-school qualifications and can provide a pathway into the industry.
Industry

Retail Trade

- 32% regional
- 31% aged 15 to 24 yrs
- 11% self-employed

**EDUCATIONAL ATTAINMENT**
- Bachelor degree or higher: 18%
- Cert III or higher VET qual: 25%
- No post-school qual: 52%

**Annual Employment Growth (%)**

Australia’s economy and jobs market will take time to rebound from the impacts of COVID-19. While Retail Trade was one of the most severely affected industries, businesses are gradually reopening and transitioning to new ways of working. Despite these challenges, Retail Trade remains Australia’s second largest employing industry.

**Top Employing Occupations**
- General Sales Assistants
- Retail Managers
- Checkout Operators and Office Cashiers
- Shelf Fillers
- Pharmacy Sales Assistants

Retail Trade employs more young people than most other industries. This is because entry level roles within the industry generally do not require prior experience or qualifications, with more than half of the workers having no post-school qualifications. Many occupations in the industry can also provide flexible hours, allowing work around school and other commitments.

It is important to remember that jobs in this industry might not always be formally advertised. When looking for work in Retail Trade, remember to ask friends, family and any other contacts if they are aware of any job opportunities. Opportunities might be available by word of mouth, or via signs in shop windows and through social media.

Wholesale Trade

- 24% regional
- 9% aged 15 to 24 yrs
- 14% self-employed

**EDUCATIONAL ATTAINMENT**
- Bachelor degree or higher: 25%
- Cert III or higher VET qual: 28%
- No post-school qual: 42%

**Annual Employment Growth (%)**

Wholesalers do not usually have a shopfront to sell their items; they are the middle step between producers and retailers. Wholesale Trade is one of the smaller employing industries, with employment mainly located in the capital cities along Australia’s east coast.

**Top Employing Occupations**
- Storepersons
- Advertising, Public Relations and Sales Managers
- Sales Representatives
- Purchasing and Supply Logistics Clerks
- Importers, Exporters and Wholesalers

Despite its relatively small size, Wholesale Trade has opportunities across many occupations, with most jobs being for Managers, Clerical and Administrative Workers, Sales Workers and Machinery Operators and Drivers. While more than 40% of this workforce does not have post-school qualifications, only a small share of this industry are younger workers (9% are aged 15 to 24 years).

Although entry level opportunities exist in every industry, positions in Wholesale Trade may be better suited to older job seekers who possess the practical experience employers seek.

Sources: ABS, Labour Force (seasonally adjusted and annual averages of original data); ABS, Characteristics of Employment; ABS, Education and Work.
Mining

Mining is an important industry in terms of its export revenue, but it is a relatively small employing industry (accounting for around 2% of Australian jobs).

Agriculture, Forestry and Fishing

Agriculture, Forestry and Fishing is an industry largely made up of workers employed in agribusiness. Most are farmers, living in regional Australia and managing their own properties. This is reflected in the high level of self-employment (around one in two workers, the highest percentage of any industry). Around 40% of workers are aged 55 years or older (again, the highest of any industry). While many industries across Australia have been negatively affected by COVID-19, Agriculture, Forestry and

Sources: ABS, Labour Force (seasonally adjusted and annual averages of original data); ABS, Characteristics of Employment; ABS, Education and Work; Department of Agriculture, ABARES farm survey results 2018, September 2019.
Accommodation and Food Services provides many opportunities for young people looking for their first job, or for mature aged workers looking to re-enter the workforce. Most entry level roles within this industry generally do not need prior experience or qualifications, with more than half of the workers not having post-school qualifications. Many occupations also provide flexible hours (around 61% of workers are employed part-time), allowing for work around school and other commitments.

This is one of the industries most impacted by the COVID-19 pandemic. Despite this, Accommodation and Food Services continues to provide many jobs, even if some of these jobs have changed to reflect this particular situation (for example, wait staff becoming delivery drivers). As lockdown restrictions ease, businesses in this industry are expected to see a significant increase in demand.

Arts and Recreation Services has a relatively young workforce (23% are aged 15 to 24 years), with most employed as Community and Personal Service Workers (27% of employment) or Professionals (23%).

The COVID-19 pandemic has had a significant negative impact on employment in the Arts and Recreation Services industry. While some organisations have been gradually reopening and transitioning to new ways of working, businesses in some parts of the country remain on hold.

Businesses using alternative delivery methods and technologies to engage with customers are creating new employment opportunities. For example, delivering fitness classes via online video conferencing, live streaming or video on demand may be solutions in the short-term (recognising that this may not be possible for every business within this industry).

Sources: ABS, Labour Force (seasonally adjusted and annual averages of original data); ABS, Characteristics of Employment; ABS, Education and Work.
Transport, Postal and Warehousing

Transport, Postal and Warehousing is a diverse industry that revolves around the movement of people and goods by road, rail or air. Postal and courier services, warehousing and storage are also included.

Electricity, Gas, Water and Waste Services

Electricity, Gas, Water and Waste Services is a relatively small employing industry, accounting for around 1% of Australian jobs.
Administrative and Support Services

Educational Attainment
- Bachelor degree or higher: 23%
- Cert III or higher VET qual: 28%
- No post-school qual: 43%
- Other qual: 6%

Top Employing Occupations
- Commercial Cleaners
- Domestic Cleaners
- Human Resource Professionals
- Gardeners
- Tourism and Travel Advisers

Administrative and Support Services is a small but essential industry which covers many services including office administration, debt collection, call centres, travel agencies, building cleaning, pest control and gardening services.

Public Administration and Safety

Educational Attainment
- Bachelor degree or higher: 43%
- Cert III or higher VET qual: 31%
- No post-school qual: 21%
- Other qual: 5%

Top Employing Occupations
- General Clerks
- Police
- Contract, Program and Project Administrators
- Security Officers and Guards
- Inspectors and Regulatory Officers

Public Administration and Safety includes federal, state and local government administration and services like the police force. It was one of the few industries to experience growth over the COVID-19 pandemic. The increase in workers is potentially due to the development and implementation of support programs as part of the Australian Government’s Coronavirus economic response, or equivalent state/territory government initiatives.

This workforce is highly skilled (more than three quarters of workers hold post-school qualifications), relatively old (just 6% are aged 15 to 24 years) and full-time work is common (83% of employment). Given this, there are fewer opportunities for entry level positions within this industry. All federal government departments, though, offer graduate programs for university graduates interested in a career in the Australian Public Service.

Sources: ABS, Labour Force (seasonally adjusted and annual averages of original data); ABS, Characteristics of Employment; ABS, Education and Work.
Information Media and Telecommunications

**EDUCATIONAL ATTAINMENT**

- Bachelor degree or higher: 43%
- Cert III or higher VET qual: 26%
- No post-school qual: 27%
- Other qual: 4%

**Top Employing Occupations**

- Telecommunications Trades Workers
- Film, Television, Radio and Stage Directors
- Journalists and Other Writers
- Artistic Directors, and Media Producers and Presenters
- Telecommunications Engineering Professionals

Employment is predominantly located in Sydney or Melbourne, but around one in five jobs are in regional Australia. It is a highly skilled workforce, with more than two thirds having a post-school qualification. Around 45% of workers are Professionals, 17% are Technicians and Trades Workers, 15% are Managers, and a further 12% are Clerical and Administrative Workers.

While qualifications are generally mandatory for the more technical roles, employers in some sectors of the industry (for example, publishing and broadcasting) may also value prior experience. A portfolio is a good way to present evidence of your relevant skills and abilities.

Rental, Hiring and Real Estate Services

**EDUCATIONAL ATTAINMENT**

- Bachelor degree or higher: 32%
- Cert III or higher VET qual: 31%
- Other qual: 6%
- No post-school qual: 31%

**Top Employing Occupations**

- Real Estate Sales Agents
- General Clerks
- Other Hospitality, Retail and Service Managers
- Land Economists and Valuers
- Receptionists

Workers in this industry generally have a broad range of qualifications, indicating that employment opportunities exist for people of all skill levels and qualifications. Work is commonly full-time (71%).

Around 10% of workers are aged between 15 to 24 years old (below the national average of 14%).

Sources: ABS, Labour Force (seasonally adjusted and annual averages of original data); ABS, Characteristics of Employment; ABS, Education and Work.
#### Jobs by Occupation

**Managers**
- 1 in 4 aged 55 or older
- Top Employing Occupations:
  1. Retail Managers
  2. Advertising, Public Relations and Sales Managers
  3. Construction Managers

**Professionals**
- 3 in 4 hold a bachelor degree or higher qualification
- Top Employing Occupations:
  1. Registered Nurses
  2. Accountants
  3. Primary School Teachers

**Technicians and Trades Workers**
- 84% employed full-time
- Top Employing Occupations:
  1. Electricians
  2. Metal Fitters and Machinists
  3. Carpenters and Joiners

**Community and Personal Service Workers**
- More than 40% employed in Health Care and Social Assistance
- Top Employing Occupations:
  1. Aged and Disabled Carers
  2. Child Carers
  3. Education Aides

**Clerical and Administrative Workers**
- Almost 3 in 4 workers are female
- Top Employing Occupations:
  1. General Clerks
  2. Receptionists
  3. Accounting Clerks

**Sales Workers**
- 38% are aged 15 to 24 years
- Top Employing Occupations:
  1. General Sales Assistants
  2. Checkout Operators and Office Cashiers
  3. Real Estate Sales Agents

**Machinery Operators and Drivers**
- 81% employed full-time
- Top Employing Occupations:
  1. Truck Drivers
  2. Storepersons
  3. Delivery Drivers

**Labourers**
- Around 60% do not hold post-school qualifications
- Top Employing Occupations:
  1. Commercial Cleaners
  2. Kitchenhands
  3. Building and Plumbing Labourers
Managers

A large number of Australians are employed as Managers and they work in many different types of organisations across all industries.

Are qualifications or experience needed?
This is a relatively skilled group, as Managers generally hold senior positions, taking responsibility for staff and operations. This means qualifications are usually needed, however, sometimes significant on-the-job experience is sufficient.

• The majority of Managers hold post-school qualifications, although this is less common for Farmers and Farm Managers and Hospitality, Retail and Service Managers.
• The need for workplace experience is reflected in the age profile of the workforce. Half of all Managers are aged 45 years or older. Just 4% are aged 15 to 24 years, although there are more opportunities for young people in Hospitality, Retail and Service Manager roles (accounting for 8% of this group).
Managers are typically skilled in communication and building relationships, planning, budgeting and problem solving.

Top Employing Occupations
Retail Managers
Advertising, Public Relations and Sales Managers
Construction Managers
Livestock Farmers
Human Resource Managers

In which industries do Managers work?
Managers work in every industry, but the largest shares are in Retail Trade and Agriculture, Forestry and Fishing (both 12%). Other major employing industries include Accommodation and Food Services (9%) and Manufacturing (9%). Some Manager occupations are concentrated in specific industries. For example, Café and Restaurant Managers are mainly employed in Accommodation and Food Services. For other Manager occupations, such as General Managers and Human Resource Managers, employment is spread across all industries.

Are there job opportunities?
When looking for Manager vacancies, remember they are not always advertised online. Some positions are filled by the promotion of existing workers, while others are advertised in less formal ways such as word of mouth or head hunting. It is important for job seekers who are looking for Manager positions to remember this and use professional networks to help bolster their recruitment chances.

Will there be future opportunities?
Managers often perform a range of non-routine, cognitive duties (such as problem solving) so this occupation group is less susceptible to automation.

Professionals is the largest employing occupation group in Australia (accounting for around one in four workers).

There are clear differences in the representation of men and women across occupations in the Professionals group. Around 74% of Health Professionals and 72% of Education Professionals are female, but 79% of ICT Professionals are male. The extent of part-time employment also varies, being relatively rare for ICT Professionals but more common for Health Professionals, Arts and Media Professionals, and Education Professionals.

In which industries do Professionals work?
Around two thirds of Professionals are employed in just three industries.

- Health Care and Social Assistance (24% of Professional employment).
- Education and Training (21%).
- Professional, Scientific and Technical Services (21%).

Are qualifications needed?
Most Professional jobs require a bachelor degree or higher qualification (75% of Professionals have this level of qualification), with university study the main pathway for employment. Reflecting the time it takes to gain relevant qualifications, a relatively small proportion of Professionals is aged 15 to 24 years.

In addition to qualifications, skills that are often required to be a Professional include communication, planning, project management, problem solving, writing and research.

Are there job opportunities?
There will continue to be job opportunities for Professionals. Along with the rising demand for these workers, however, the supply of university educated Australians is also increasing, with higher education enrolments increasing significantly over the past decade. With more university graduates, and more people searching for work, there are now large numbers of qualified applicants competing for some Professional occupations.

With increased competition, job seekers are encouraged to be as flexible as possible with their availability and highlight their transferable skills and experience. Employers will be looking for reliable and flexible workers, with good communication skills who can learn new tasks quickly and adapt to new working environments. If you can, give examples from your work history which highlight these skills and make you stand out from the crowd.

Will there be future opportunities?
Professionals perform analytical, conceptual and creative tasks which are less susceptible to technological automation.
Technicians and Trades Workers undertake a variety of skilled manual tasks. They apply technical, trade or industry specific knowledge in construction, manufacturing, scientific, engineering and other activities.

Regional employment is fairly common with more than a third of workers employed across regional Australia. A relatively large proportion of this group are self-employed (25%), particularly Construction Trades Workers (47%), and full-time work is common.

Technicians and Trades Workers has the second lowest percentage of female workers of any occupation group (16%). This is especially apparent for Automotive and Engineering Trades Workers, Construction Trades Workers, and Electrotechnology and Telecommunications Trades Workers. That said, some occupations have large shares of female workers, such as Veterinary Nurses (97%) and Hairdressers (85%).

What qualifications and skills are needed?
Almost 60% of Technicians and Trades Workers hold a certificate III or higher vocational qualification, with apprenticeships and traineeships providing a key training pathway for many occupations in this group.
Community and Personal Service Workers provide a wide range of services, including in the areas of aged and disability care, health and social welfare, child care, hospitality, policing, tourism and sports. Employment is largely concentrated in two industries, with 41% employed in Health Care and Social Assistance and 18% in Accommodation and Food Services.

Workers are mainly female (70%) and part-time employment is common (55%), although there are differences by subgroup. For example, Protective Service Workers (which includes Police, Fire and Emergency Workers and Security Officers and Guards) is largely a male workforce (76%) and has a relatively low level of part-time employment (15%).

Are qualifications needed?
Entry pathways are varied, reflecting the diverse range of services provided by workers in this group. Around 41% of workers have a certificate III or higher vocational qualification, 32% do not hold a post-school qualification and 21% have a bachelor degree or higher.

Community and Personal Service Workers (which includes Ambulance Officers and Paramedics and Dental Hygienists, Technicians and Therapists) is the most highly educated subgroup, with 88% holding post-school qualifications.

Are there job opportunities?
Some occupations in this group provide good entry level employment opportunities. For example, young workers (aged 15 to 24 years) account for 55% of Hospitality Workers and post-school study is often not needed for these jobs. For jobs within the health care sector, check online recruitment websites as they are regularly used by employers. It is important that you also remember to check the websites of big employers, as many will only advertise jobs on their own websites.

Will there be future opportunities?
Jobs in this group typically require skills that are less likely to be automated with technology (such as interpersonal and communication skills). A significant share of the workers in this occupation group are employed in Health Care and Social Assistance and future demand is expected to be driven by population growth, an ageing population and the continued expansion of the National Disability Insurance Scheme.

Sources: ABS, Australian and New Zealand Standard Classification of Occupations; ABS, Characteristics of Employment; ABS, Education and Work; ABS, Labour Force (seasonally adjusted and annual averages of original data); National Skills Commission, Survey of Employers’ Recruitment Experiences; Victorian Council of Social Services; Supporting Australia’s future community services workforce.
Clerical and Administrative Workers provide support to businesses by organising, storing, manipulating and retrieving information. Employment is spread widely across industries but most jobs are likely to be office-based.

Sales Workers sell goods, services and property, and provide sales support. A large share of these workers are employed in Retail Trade (60%).

Few jobs in this group require post-school qualifications and the workforce is relatively young (38% are aged 15 to 24 years).

Machinery Operators and Drivers

EDUCATIONAL ATTAINMENT

- Bachelor degree or higher: 10%
- Cert III or higher VET qual: 30%
- No post-school qual: 54%

Annual Employment Growth (%)

Machinery Operators and Drivers operate machines and vehicles and are mainly employed in Transport, Postal and Warehousing, Manufacturing and Construction. More than one third of workers in this group are employed in regional Australia.

Top Employing Occupations

- Truck Drivers
- Storepersons
- Delivery Drivers
- Forklift Drivers
- Drillers, Miners and Shot Firers

Post-school qualifications are often not essential to gain employment in this group, but tickets or licences are mandatory for many positions. Employers value employability skills such as communication, teamwork, problem solving, creativity and initiative.

This occupation group is mostly male (89% of the workforce) and the age profile is relatively old (more than one in four workers is aged 55 years or older).

Labourers

EDUCATIONAL ATTAINMENT

- Bachelor degree or higher: 10%
- Cert III or higher VET qual: 25%
- No post-school qual: 58%

Annual Employment Growth (%)

Labourers perform a variety of routine and repetitive physical tasks. Some Labourer jobs require physical fitness (like Building and Plumbing Labourers) but not all involve heavy work (for example, Fast Food Cooks).

Jobs in this group are often advertised informally, with many being filled by applicants approaching the employer directly.

Top Employing Occupations

- Commercial Cleaners
- Kitchenhands
- Building and Plumbing Labourers
- Shelf Fillers
- Packers

Most Labourer positions do not generally require post-school qualifications, a large share of workers are aged 15 to 24 years and part-time work is common. Accordingly, there are good opportunities for young people to gain work experience or combine work with study.

While formal qualifications are not necessarily a requirement for these roles, some may require mandatory tickets or licences. In addition, job seekers will generally need to possess a driver’s licence and their own personal transport.

Victorians work in either Health Care and Social Assistance or Retail Trade. More than half of jobs are located in regional Tasmania. A large share of Queensland workers hold a certificate III or higher vocational qualification. More than half of Mining jobs across Australia are in this state. Nearly 50% of jobs are located in Darwin. The most highly educated workforce in Australia is in the Australian Capital Territory. Australia’s largest employing state is New South Wales. More than 80% of employment is concentrated in Adelaide. Nearly 2/3 of Mining jobs across Australia are in this state. 34% of jobs are in regional Tasmania. Jobs by Location.

New South Wales is the largest employing state in Australia. Most jobs are in Sydney, which accounts for around 70% of the state’s employment.

Around 70% of the state’s workforce has post-school qualifications and they are more likely to hold a bachelor degree or higher than workers nationally. Greater Sydney is the most highly educated workforce in the state, with 72% holding post-school qualifications (including 42% with a bachelor degree or higher).

There are multiple regions, however, where it is far more common for workers to have VET qualifications rather than those gained through a university (such as the Mid North Coast where 44% of the workforce has a Cert III or higher VET qualification).

The age profile of this state is largely in line with the national average, although some regions have relatively large shares of workers aged 15 to 24 years. These include Newcastle, Lake Macquarie, and Murray.

Self-employment may also offer an opportunity for work, or a different career path. While it is less common in New South Wales than in some other areas, around 16% of workers are their own boss. For further information on self-employment and how the government can help in this area, please see page 39.

Victoria is the second largest employing state, with the majority of jobs located in Melbourne. While Victorians are employed across all industries, around one in four work in either Health Care and Social Assistance or Retail Trade. For more information on these industries, please see pages 5 and 8.

Around 70% of Victorian workers have post-school qualifications, with a relatively large share holding a bachelor degree or higher. Workers in Melbourne are more likely to hold a bachelor degree or higher qualification than those in regional Victoria, where a certificate III or higher VET qualification is more common.

Part-time work is relatively common, accounting for around a third of total employment. Workers in both Geelong and Shepparton are the most likely to be employed in this manner (38% and 37%). A full breakdown of part-time work across the state is available in the table below.

Despite the general downturn, the size and diversity of the Victorian labour market means employment opportunities will continue to exist across all industries. Employers need workers who are resilient, proactive and capable and, if you are able to demonstrate these attributes, you will stand out from the crowd. Digital skills are also important, with continued enhancements in technology affecting jobs and society more broadly. For more information on skills in the future, please see page 34.

Queensland

Top Employing Industries

- Health Care and Social Assistance
- Retail Trade
- Construction
- Education and Training
- Professional, Scientific and Technical Services

Queensland is the third largest employing state in Australia, with around half the jobs located in Brisbane and a further 13% in the Gold Coast area.

Given the size and diversity of the Queensland economy, employment opportunities exist across all industries. Health Care and Social Assistance is the largest employing industry in Queensland, with 15% of the state’s employment. There are many roles within this industry that do not require medical qualifications or extensive prior experience. Some of these include Receptionists, General Clerks, Kitchenhands and Commercial Cleaners.

Construction is another large employer, representing around 10% of total employment. For more information on this industry, please see page 6.

Workers in Queensland are less likely to hold a bachelor degree or higher than the national average, but are more likely to have a certificate III or higher vocational qualification. There is a higher proportion of females employed in this state than the national average and around one in three Queensland workers are employed part-time.

It is worth noting that Queenslanders are more likely to be self-employed than workers in the rest of Australia, with around one in five employed Queenslanders working as their own boss. If you are Australia’s next top young entrepreneur, please see page 39 on the government programs which may help you reach your self-employment ambitions.

South Australia

Top Employing Industries

Health Care and Social Assistance
Retail Trade
Manufacturing
Education and Training
Construction

South Australia has a relatively small workforce, with around 7% of national employment. Employment is concentrated in Adelaide, which accounts for 78% of state employment.

While there are employment opportunities available across all industries, more than one in three workers are employed in Health Care and Social Assistance, Retail Trade or Manufacturing.

Construction and Education and Training each represent 8% of the state’s employment, with a further 6% employed in each of Professional, Scientific and Technical Services, Public Administration and Safety, and Accommodation and Food Services. Electricity, Gas, Water and Waste Services is South Australia’s smallest industry, accounting for 1% of employment.

Part-time employment is relatively common in this state, accounting for around 36% of employment (compared with the national average of 31%). The Barossa–Yorke–Mid North area (encompassing Clare, Peterborough, Port Pirie, Tanunda and Wallaroo) has the largest proportion of part-time employment in the state.

South Australian workers are less likely to hold post-school qualifications than workers nationally. Reversing the Australian trend, a higher share of workers in this state hold a certificate III or higher vocational qualification (31%) than those who have a bachelor degree or higher (26%).

Western Australia

Top Employing Industries

Health Care and Social Assistance

Construction

Mining

Retail Trade

Public Administration and Safety

Western Australia is the fourth largest employing state, with employment mostly located in Perth.

The largest employing industry in Western Australia is Health Care and Social Assistance. Demand for work in this industry is only going to increase given Australia’s ageing population. It is worth noting that not everyone employed in this industry is a doctor or a nurse.

Some of the top employing occupations in Health Care and Social Assistance include Receptionists, General Clerks, Kitchenhands and Commercial Cleaners. These are all occupations that can be perfect entry level positions and generally require minimal qualifications or prior experience. For more information on this industry, see page 5.

Unlike the rest of Australia, a large proportion of Western Australians are employed in the Mining industry (around one in 10 workers). Reflecting this, nearly half of total Mining employment is located in Western Australia.

While many jobs across Australia have been adversely affected by COVID-19, some areas of the economy have seen an increase in demand. This includes some areas of mining and mining services. For more information on this industry, please see page 9.

While Tasmania is the smallest employing state, there are employment opportunities available across all industries. Health Care and Social Assistance is the largest employing industry (14%), closely followed by Retail Trade and Education and Training. For more information on these industries, please see pages 5 and 8.

Tasmania has the oldest workforce of any state or territory, with 46% aged 45 years or older. Part-time work is also relatively common (39% of state employment, the largest share in Australia). Workers in this state are less likely to have a bachelor degree or higher than the national average, although they are more likely to have completed a certificate III or higher vocational qualification.

Tasmania has the most regionally diverse workforce in Australia, with just over half of all workers employed outside of Hobart.

**Educational Attainment**

- Bachelor degree or higher: 28%
- Cert III or higher VET qual: 33%
- Other qual: 7%
- No post-school qual: 32%

Sources: ABS, Labour Force (seasonally adjusted and annual averages of original data); ABS, Characteristics of Employment; ABS, Education and Work.
The Northern Territory is the smallest labour market in Australia, with almost two thirds of employment located in Darwin. Public Administration and Safety is the largest employing industry (20%), followed by Health Care and Social Assistance (18%).

Given the small size of the Territory’s workforce (compared with the rest of Australia), it is important to make the most of your relationships with friends, family and other local contacts as they may be aware of job opportunities.

Vacancies that might be formally advertised in other parts of Australia are often advertised through more informal ways (for example, word of mouth, sign in a shop window or on social media). Knowing that, people looking for work might find more opportunities by using every available method. For information on what employers are looking for, please see page 30.

### Australian Capital Territory

Unlike other states, employment in the Australian Capital Territory (ACT) is mainly in one industry—Public Administration and Safety. Around one in three Canberran workers are employed in this industry, and most work in public service roles for either the federal or territory government.

However, not all roles within Public Administration and Safety are desk jobs. This industry employs workers across a broad range of areas including graphic design, event management and communication (increasingly through social media).

With many workers returning to their offices following working from home arrangements, there may also be entry level job openings in cafés and restaurants as demand for these services increases. It is important to note, however, that these jobs are typically advertised by word of mouth. More information on how employers find workers can be found on page 29.

Sources: ABS, Labour Force (seasonally adjusted and annual averages of original data); ABS, Characteristics of Employment; ABS, Education and Work.
Where do you look for a job?

Finding a job

The first step on the road to employment is finding a job. But where are jobs listed? Employers often use a number of methods to find candidates and below are some of the most common methods used.

Newspapers

Don’t forget about the humble newspaper—many employers still advertise their job openings in the classifieds section.

Keep an eye out for jobs posted in your local newspaper, especially if you live in a regional area.

8% of jobs are advertised in newspapers

Internet

Many employers use the internet to advertise jobs. This includes their own company website, or job search websites like Australian Job Search.

55% of jobs are advertised on recruitment and company websites

Social media

More and more employers are using social media to hire workers. Look out for ads posted on business pages or in social media job groups.

If you are contacting an employer or business for work on Facebook, make sure your public profile is presentable! Employers often look at profiles to review potential employees.

Internet

Many employers use the internet to advertise jobs. This includes their own company website, or job search websites like Australian Job Search.

55% of jobs are advertised on recruitment and company websites

Word of Mouth

Employers often ask people they know to ‘spread the word’ about an available position, or even ask current staff if they know someone who would fit the role.

33% of jobs are promoted by word of mouth

Approach employers

Many job seekers approach employers to ask if they have any jobs open or to drop off their résumé. Employers often consider these job seekers for current or future opportunities.

Meeting and talking to employers is a chance to make a good impression. Showing enthusiasm in person gives you a better chance at a job over someone who simply drops off their résumé.

Not all jobs are advertised! Don’t forget to approach employers directly as well!
What Employers Are Looking For

As the jobs market becomes more competitive as a result of the COVID-19 pandemic, it is more important than ever to understand what employers are looking for. Even before the pandemic, employers received an average of 21 applicants per vacancy. With many more people now unemployed, the competition for the available jobs will be greater.

Generally, employers are looking for someone with the whole package: the right educational qualifications are essential and work experience is often a prerequisite. Also, do not forget your employability skills! Employers may be willing to compromise on some aspects, depending on the type of job, but not on others. For example, an employer may hire someone as a Checkout Operator without any work experience, but will insist on good teamwork and customer service skills.

Education and training

Overall, work is becoming more skilled. The majority of jobs created in the future will require a Vocational Education and Training (VET) or university qualification. The workforce has also become more skilled, with nearly two-thirds of the working age population (aged 15 to 64 years) in 2019 holding a post-school qualification (up from 51% in 2014).

Completing Year 12 (or equivalent) is the minimum requirement for most employers, however, many are seeking people with post-school qualifications.

University is not the only pathway to a good job. Apprenticeships, traineeships, diplomas or certificate III or IV level qualifications will also set you up for a stable and rewarding career.

If you are considering a VET course or qualification, the best type of training is related to the job you want to do. But don’t do training for the sake of it! For example, Personal Carers often require certificates in food handling and first aid, but one certificate I (or several) may not help in the long-term. A certificate III or higher qualification will likely include the relevant training, along with a range of other units important for this occupation.

In response to COVID-19, new short courses, or ‘micro-credentials’, are also available to help you upskill (check out courseseeker.edu.au for available courses). These short courses can be a good way to gain new skills relevant to the jobs in demand.

Experience

Workplace experience is another important quality that employers look for. All jobs will give you valuable experience and help you develop vital employability skills. Regardless of the job, you will gain an understanding of what is expected in the workplace and be able to demonstrate to employers that you are committed to work, reliable and trustworthy. Most importantly, it gives you a foot in the door and provides you with an opportunity to build your network and gain referees.

Experience can be gained through part-time, casual, or temporary jobs, work experience placements, internships or even by volunteering.

What if you do not have any work experience?

If you don’t have any work experience, think about other ways to demonstrate your transferable skills. You could provide examples from your school activities or work on group projects, working with your local sports club, even participating in debating, theatre or dance performances or chess competitions. Employers are also very encouraged by young people who participate in community or volunteering activities.

There are also some jobs for which employers are more likely to consider someone without previous experience, such as Fast Food Cooks, Packers and Pharmacy Sales Assistants. Research conducted by the NSC indicates many of these jobs have been in demand during the COVID-19 pandemic, such as General Sales Assistants and Checkout Operators.

<table>

Finding a Job

Employability skills

Employers often place a high value on employability skills as they want someone who will be a good fit for their business. While you can gain these skills through work experience, they are not job-specific, cover a range of personal qualities and skills, and transfer across different occupations and industries.

Core skills

- People skills
- Communication skills
- Work ethic
- Initiative
- Problem solving
- Ability to work in a team
- Personal presentation

21st Century Skills

- Problem solving
- Digital literacy
- Creativity
- Presenting skills
- Critical thinking
- Financial literacy

Recent research by the NSC highlights the importance of these skills, showing that three quarters of employers consider personal qualities at least as important as, if not more than, technical skills.

You need an excellent résumé and job application

Your résumé and application are often your first chance to market yourself to potential employers. To improve your chances of reaching the next stage in the recruitment process, your application will need to stand out.

How do you do this?

- Research the business and job. This will help you tailor your application and show your interest in the position.
- Ring the employer and ask questions about the job and the business. Doing this demonstrates your enthusiasm and the employer will remember you and look for your application.
- Be succinct. Your application and résumé should be around 1-2 pages each.
- If possible, include examples from your current job, work history or extracurricular activities and explain how these directly relate to the position on offer.
- Double and triple-check that there are no spelling or grammatical errors in your application. Also consider asking someone to review your application, to help pick up any mistakes you may have missed.

Tailor your application to each job

Every job and business is different, so write your application specifically for each job. Do not fall into the trap of using generic applications. Imagine what an employer would think if they receive an application better suited to a role as a sales representative when their position is for an apprentice refrigeration mechanic.

Employers want the right match for their business, and showing that you have read the job description carefully and researched their organisation will help set you apart from other candidates.

More advice on writing résumés and job applications can be found at jobsearch.gov.au.

Digital job applications

Applying for a job has changed—many employers are using new technologies in their recruitment processes as a result of the COVID-19 pandemic. For example, some employers are using software to scan résumés to shortlist candidates who match their needs.

Here are some tips that may help you land a job online:

- make sure you read all instructions carefully so you don’t miss any steps
- check that all information and responses for online applications are well thought out and don’t have any spelling or grammar mistakes
- make your résumé software friendly by using a simple format and clearly addressing any selection criteria and required skills
- some employers will do an online search for your name or look at your social media profile, so consider reviewing your digital presence to ensure it is appropriate
- be prepared for video interviews—know where to find a good internet connection and professional backdrop, and make the most of the time available for each question. Also dress professionally—a good rule is to dress as you would for an interview in-person.

Where do you look for a job?

Winning a Job

Get ready for the interview: Prepare, Plan, Practise and Presentation

The interview is usually the second stage of marketing yourself and landing a job. Interviews can be nerve wracking, but some preparation beforehand can really help you stand out.

• Practise interview questions with a friend or family member.
• Prepare some questions about the job and business to ask at the interview. This demonstrates your interest and shows that you are prepared.
• Think about your presentation and what you will wear. Remember, first impressions count! Dress appropriately for the job. While formal business attire may be fitting for a job based in an office, it may not be as suitable for a job in a fashion retailer.
• Don’t be late! Find out where you need to be, plan your trip and aim to arrive at least 10 minutes early.
• Explain the skills that you would bring to the job, and talk about your employability skills. Employers want to know who they will be working with and the interview is your opportunity to demonstrate this.
• Prepare examples to demonstrate your skills based on your real life experiences, such as at a previous job, while studying or volunteering.

Tell your friends and family you are looking for a job

More than a quarter (or 27%) of employers fill a job with someone they know, directly or indirectly. This rises to 39% of employers in regional areas. It is common for employers to hire someone who is:

• personally known to them, such as a friend or family contact
• a professional contact (for example, a previous co-worker)
• recommended by someone they know.

“[The job seeker]... asked if we had any jobs going. We didn’t actually need anyone at the time, but she had good qualifications and a good personality so we added her”

Property and Real Estate Services employer

“I’m more likely to employ someone who is not experienced if they come looking for a job... it shows initiative”

Accommodation and Food Services employer

Depending on what job you are looking for and how affected it is by the COVID-19 pandemic, there may not be as many opportunities available at the moment. By telling friends, family contacts, school teachers or neighbours that you are currently looking for work can help improve your chances of hearing about a job opening, or even being recommended for one when an opening occurs.

Don’t forget that social media is a perfectly good way to contact people too! However, don’t ask for a job straight away—send a simple message with what you have been doing, that you are looking to start working or move on from your previous job, and ask for some advice or insight. This way, if whoever you tell does become aware of an opportunity, they are more likely to think of you.

Get out there and talk to employers

If you don’t have a wide network of people, or if you have already told people you’re looking for work and haven’t heard anything, don’t be discouraged! Remember that approaching employers directly to ask if they have any positions available can also lead to a job.

In fact, for 11% of vacancies, employers consider people who have approached them looking for work, with many employers actually hiring them. Approaching employers lets you show your communication skills, initiative and motivation—traits that many employers are looking for.

This can be a daunting prospect for many, however, make sure you use it as an opportunity to have a conversation and make a lasting impression—this will make you stand out amongst other job seekers who just drop off their résumé. If an employer doesn’t have a job available at the time, but suggests you get in contact again at a later date, make sure you follow up. It shows initiative, that you were listening and are keen. You could just be in the right place at the right time!

What if your approach is not working?

You may need to consider:

• whether your expectations are realistic. It is unlikely that you will start at the top and you need to show you are willing to work your way up from the bottom
• widening your search to different types of jobs and locations
• applying for contract or casual work, part-time or shift work.

Don’t be afraid to ask for feedback if you are unsuccessful. Many employers will tell you why you didn’t get the job. With each application and interview you gain experience that you can use to improve your job search skills. It is all part of the job search experience.

Looking for a job is hard work. Depending on where you live, there can be a lot of competition for jobs. It can take a while to secure a position and you may receive knockbacks in the process, but if you keep trying, your efforts will pay off.

Remember, while some industries may take time to recover from the COVID-19 pandemic, there will be opportunities across many sectors, such as Construction and Health Care and Social Assistance (more information on these industries can be found on pages 5 and 6). COVID-19 may also speed up other trends, such as the move to online shopping. To boost your chances, you need to be flexible and look widely for opportunities — your first job may take you to the warehouse floor, rather than the shop floor!

Remember that all jobs can open doors to something better and give you valuable experience and skills — don’t just wait to land the perfect job.

Job Outlook

How can you find your way in a changing world of work?
When you’re thinking about work and study options, it can be helpful to understand:

• the jobs available now and in the future
• how the skills you have now can help you get your next job
• the skills or qualifications you might need to succeed.

Explore occupations by industry, pathway or work style.
Learn more about the jobs that interest you. Job Outlook has detailed information about main tasks, average earnings, usual qualifications and more.

Enter past jobs in SKILLS MATCH to see skills you might have built.
A part-time job can give you more than extra cash. Skills Match can show you skills you might have built from your past jobs, including voluntary work and unpaid work experience. This can be helpful when you are building a resume or working out what to say to potential employers.

Find the pathway to your next job.
We’ve researched more than 1000 occupations to uncover the qualifications workers need or usually have, typical registration requirements, and links to industry websites for more information. There are also links to vacancies for when you are ready to start applying for jobs.
Skills for the Future

Skills are key
The COVID-19 pandemic has caused large-scale disruption to Australian businesses, workplaces and jobs. Even as the Australian economy recovers, we are likely to see more workforce transitions due to increased digitisation, technological adoption and ongoing structural changes.

In these times of global uncertainty and change, skills are key. The Australian Government, through the NSC, is providing a range of job matching tools and resources to help young people and existing workers skill and reskill themselves for jobs and careers that are in demand. More information can be found at yourcareer.gov.au.

What types of skills will be in demand?
When applying for jobs, remember to emphasise your employability skills, rather than just the technical skills you may have. Communication, reliability, teamwork, patience, resilience and initiative are required for all jobs, and this will continue to be the case in the future. These skills are also highly valued by employers. A 2019 survey conducted by the NSC asked employers about the importance of these sorts of skills. Some 75% of employers considered employability skills to be as important, if not more important, than technical skills.

Can skills gained in one job be transferred to another job?
Many jobs have similar skill sets. If you are looking for work or facing a change of job, the good news is that you’re likely to have many transferable skills. Identifying your transferable skills can open up a broader range of job opportunities—see the diagram below.

For further information on the skills employers will need into the future, please visit the Your Career website. This website provides clear and simply career information and is designed to help people of all ages and circumstances better plan and manage their career. It has resources on training options, information and services to support career development.
What new opportunities might be created by technological change?

The COVID-19 pandemic may speed up workforce transitions already underway due to technological change. Some businesses could move their business online and adopt new ways of working.

In order to provide up-to-date and accurate information about these new opportunities, the NSC has undertaken work to identify the occupations that have emerged from this period of transition. Examples include Social Media Specialists and Wind Turbine Technicians. More information on these emerging occupations can be found on page 3.

As the Australian economy recovers, the jobs created may not be the same as those that were lost. Technological change may also change some jobs and their skills requirements. For example, school teachers are engaging with online learning and using technology to apply multiple teaching methods in class.

While some workforce disruptions have been challenging, technology is creating new opportunities. For example, there may be more opportunities to enjoy a regional lifestyle while working remotely. In turn, regional population growth could create more local job opportunities, strengthening those communities and economies.

Will training and qualifications be necessary?

There are many pathways to work, and it is important to make decisions based on your own strengths. In a competitive labour market, training and qualifications matter. It also helps to understand the skills you acquire through your education, training and work experience.

You can use the Government’s resources like Jobs Hub and Skills Match to identify your transferable skills and address skills gaps. These resources also identify local labour market trends and opportunities—so you know your training and qualifications will lead to ongoing work.

Skills development and lifelong learning will expand your opportunities as some jobs change, new jobs emerge, and technological progress continues.
Education and Employment

There are many options when you are leaving school, or are entering or re-entering the workforce at an older age. For some people, the thought of further study is exciting, but for others it isn’t a viable or favoured choice.

- If you are considering gaining additional qualifications, there are two main training pathways for you to consider.
- The Vocational Education and Training (VET) system develops workplace-specific skills and knowledge by delivering nationally recognised training. VET includes publicly owned TAFE institutes, private providers (including enterprise and industry providers), community organisations and schools. It provides training for a vast array of occupations, including highly skilled Technician and Trades Worker roles.
- Australia’s higher education system is made up of universities and other institutions that offer undergraduate degrees and higher qualifications. Higher education is the pathway to a range of jobs, including the most highly skilled Professional occupations.

Employment and training decisions should be based on a variety of factors including aptitude, interests, expectations of pay and working conditions, training and goals.

Educational attainment is rising

The number of people undertaking tertiary training is increasing and more of the workforce now holds post-school qualifications. In 2019, 68% of Australians aged 20 to 64 years held post-school qualifications (up from 60% in 2009), with growth recorded in both VET and higher education qualifications.

Post-school qualifications are beneficial in today’s jobs market

People with higher level qualifications generally have better employment outcomes than those who have not completed further education after leaving school.

Labour market outcomes by highest level of educational attainment, 2019 (%)

Higher qualifications also generally lead to increased real wages. Some lower skilled occupations, though, have relatively high pay, sometimes to compensate for unsociable working hours or difficult working conditions.

What if I don’t complete further education?

Although most new jobs created in recent years (and those expected in the future) are in skilled occupations, there will continue to be large numbers of jobs in lower skilled occupations (that is, jobs which do not usually require post-school qualifications). Lower skilled occupations generally have higher turnover rates than those which require post-school qualifications and many job openings are available each year across all industries.

Significant proportions of Labourers (58%), Sales Workers (56%) and Machinery Operators and Drivers (54%) do not hold post-school qualifications. This includes occupations like General Sales Assistants, Waiters, Checkout Operators and Office Cashiers, and Truck Drivers.

There are opportunities in all industries for people who do not have post-school qualifications. For example, more than half of the jobs in Accommodation and Food Services and Retail Trade are held by workers who do not have such qualifications.

Proportion of workforce without post-school qualifications, top 5 industries, 2019 (%)

What is needed to gain employment without post-school qualifications?

There is often strong competition for jobs which do not require post-school qualifications. Previous experience is commonly required by employers and this can be a key barrier for new job seekers. There are, though, a number of strategies which can enhance a job seeker’s prospects. These are outlined on page 32.
Education Enrolments

Vocational Education and Training (VET)

The VET system provides a skilled workforce with nationally recognised qualifications and knowledge-based competencies. Students can enrol in qualifications (with around 2,000 on offer), accredited courses, industry recognised skill sets and units of competency, allowing them to gain the specific skills they need, when they need them. Training takes place in classrooms, workplaces and online, and can be full-time or part-time.

The largest numbers of program enrolments are in the fields of education of Management and Commerce and Society and Culture.

*Total includes students of whose age is not known

As part of the 4.2 million VET program enrolments in 2019, there were 2.6 million enrolments in stand-alone VET subjects. This training (referred to as subject only training) includes courses that are critical both to employers and the Australian economy. Examples include “construction white cards” for building sites, responsible service of alcohol and first-aid certifications.

Higher Education

Universities offer courses at the undergraduate and postgraduate levels, including associate degrees, bachelor degrees, masters and PhD qualifications. The vast majority of students study at the bachelor degree level (71% in 2017). Higher education usually involves a commitment to at least three years of full-time equivalent study to attain a bachelor degree, but many courses involve longer periods of education.

There were 1.09 million domestic students enrolled in higher education in 2019 (up by 34% over the past decade).

What subject areas are available?

The higher education sector provides training in all fields of education, but the largest numbers of enrolments are in Society and Culture (289,100 enrolments in 2019), which is a diverse field of education including studies in law, psychology, human welfare and society, language and linguistics, economics and sport and recreation.

Further information on higher education enrolments can be found at education.gov.au/higher-education-statistics.

Total includes some mixed field and non-award courses.

Apprenticeships and traineeships are a form of skills development that combine paid on-the-job work with training. They provide a nationally recognised VET qualification as well as relevant work experience. Reflecting how highly workplace experience is valued by employers, apprentices and trainees generally have strong graduate employment outcomes.

There were 272,500 apprentices and trainees in-training in March 2020, working across more than 300 different occupations, including many non-trade occupations.

*Income figures are for those employed full-time.

What apprenticeships or traineeships are considered to be trades?

There is a wide range of occupations regarded as trades. Some examples are construction trades workers, hairdressers, mechanics, metal trades workers, electricians, telecommunications workers, aircraft maintenance engineers, locksmiths, cabinetmakers and chefs.

VET graduates with improved employment status after training, by field of education, 2019

Graduates in Architecture and building, Education and Engineering and related technology commonly reported employability benefits from their study, with more than 70% of these graduates stating they improved their employment status after training. Information technology and Creative arts graduates reported the least improvement in employment status after graduating (38% and 40% respectively).

Do VET graduates have high earnings?

Workers who hold a VET qualification at the certificate III or higher level generally earn more than those who have not studied after leaving school (see page 36). In 2019, the median annual income for VET graduates working full-time after completing their training was $59,100. The highest median salaries were for those who studied

- Engineering and Related Technologies ($67,800)
- Architecture and Building ($62,600)
- Management and Commerce ($62,000).

Higher education graduate employment outcomes

While higher level qualifications ultimately improve employment prospects, employment outcomes for students immediately after graduation have weakened over the past decade. Positively, though, outcomes have generally improved over the last five years. In 2019, 72.2% of bachelor degree graduates (available for full-time work) were in full-time employment four months after graduation.

Higher education graduate salaries

In 2019, the median annual full-time starting salary for an undergraduate was $62,600. Postgraduate coursework graduates had a median starting salary of $85,300 and for postgraduate research graduates it was $90,000.

The highest bachelor degree graduate salaries by area of study were

- Dentistry (median of $88,200)
- Medicine ($73,100)
- Teacher education ($68,000).

Self-Employment and Entrepreneurship

For many people, starting and running a business is an alternative pathway to employment or an opportunity for a career change.

An entrepreneur is anyone who starts and builds a business. There are people who are able to turn their hobby into a business and make money as a sole trader, people who start a new business but remain small (with just a few employees) and there are high-growth start-ups which focus on scale and export from the outset.

All new businesses are unique in their approach, planning and trajectory.

Self-employment can benefit individuals and the economy

Self-employment has many potential benefits for business owners, including the flexibility to work when and how they choose, the opportunity to learn new skills, and the ability to generate income. More than half of Australians think that there are good opportunities to start a business and almost half believe they possess the skills to do so. Self-employment and entrepreneurship gives people the freedom to do things differently and to come up with new ideas. Small businesses are more likely to be innovative and bring new goods and services to a market than large businesses.

In addition to the potential benefits to individuals, small businesses are valuable to the Australian economy. In 2019, there were around 2.3 million small businesses (employing fewer than 20 workers) in Australia that employed around 4.9 million Australians (44% of the workforce) and accounted for 35% of Australia’s gross domestic profit.

Self-employment considerations

Starting and running a business can be a rewarding but challenging experience, and not all small businesses survive. While there were just over 2 million small businesses operating in June 2014, only 1.3 million (or 65%) were still in business in June 2018. In addition, small business owners often have net income below the average Australian wage. Of those who think there are good opportunities to start a business, more than 40% state that fear of failure would prevent them from doing so.

Starting your own business may require start-up funding, an idea, long hours, resourcefulness, and hard work. Exploring your idea, thinking about the skills and funding you need, and undertaking business planning are good first steps if you are thinking about starting your own business. It is also important to have support and guidance throughout your journey to becoming a small business owner.

Where to go for support?

There are a number of government resources available to assist people who want to start their own business and show what self-employment may look like for them.

SelfStart Online Hub

The SelfStart Online Hub is a starting point for people who wish to explore and develop their ideas into a successful business. SelfStart aims to connect people to existing services and programs, as well as provide information that will assist them to start a business. For more information, go to jobsearch.gov.au/selfstart.

New Business Assistance with NEIS

New Business Assistance with NEIS helps people start their own business. The program provides accredited business training, assistance to develop a business plan and mentoring and advice in the first year of a new business. Since the program was introduced in 1985, it has helped more than 180,000 people start their own business.

New Business Assistance with NEIS is delivered by a national network of NEIS providers. You can find your nearest NEIS provider and more information at dese.gov.au/neis.

Entrepreneurship Facilitators

Entrepreneurship Facilitators are located in 23 locations across Australia to provide practical assistance to support and encourage people looking to start a business. Facilitators provide information and advice through workshops, networking events and one-on-one mentoring providing tailored advice. They also help people connect with other appropriate services that are available to help start and run a business, for example, New Business Assistance with NEIS or business support services.

Contact details for Entrepreneurship Facilitators are available from dese.gov.au/entrepreneurship-facilitators.

Business.gov.au

Government Programs

Employee and Employer Incentives

Government assistance is available to help job seekers find the right job, and to help employers find the right workers. The information below is summary in nature and cannot fully explain the large number of policies, programs and incentives available. More information is can be found on the Department of Education, Skills and Employment website dese.gov.au or you can call the National Customer Service Line on 1800 805 260.

Some useful resources are provided below.

jobactive
jobactive.gov.au

jobactive is the Australian Government’s way to get more Australians into work. It connects job seekers with employers and is delivered by a network of jobactive providers in over 1700 locations across Australia. jobactive providers assist job seekers to get and keep a job, and offer employers an end-to-end tailored recruitment service to find and hire staff. The jobactive website can help job seekers to find and apply for jobs, keep track of job searches, create a personal profile and get job alerts. Employers who hire an eligible job seeker could be eligible to receive a wage subsidy.

A jobactive provider can help job seekers to
- write a résumé
- look for work
- prepare for interviews
- get the skills that local employers need
- find and keep a job
- connect job seekers to a range of government initiatives.

A jobactive provider can help employers to
- screen and shortlist applicants
- find candidates for their business
- assist new employees after they start work
- access wage subsidies if they hire an eligible employee.

The jobactive website can help job seekers and employers find out more about jobactive and to find local providers. Job seekers can also call the Job Seeker Hotline on 1800 805 260, and employers can call the Employer Hotline on 13 17 15.

Youth Jobs PaTH
jobactive.gov.au/path

An Australian Government program that supports young people to gain the work experience and skills they need to get a job. Through Youth Jobs PaTH, young job seekers can undertake practical face-to-face training, tailored to their needs, to improve their job preparation skills.

Job seekers can undertake an internship placement with a business looking for new staff. This allows employers to trial a young person in their business for 4-12 weeks, for 30 to 50 hours per fortnight, where there is a reasonable prospect of employment at the end of the trial. If the trial results in employment, the employer may be eligible to receive a wage subsidy. Youth Jobs PaTH has 3 steps: Prepare–Trial–Hire.

Transition to Work
employment.gov.au/transition-work

Supports young people (aged 15-24) on their journey to employment. Transition to Work helps workers get job-ready with intensive pre-employment support and help them set and achieve employment and education goals.

Transition to Work providers work with employers to find and hire a young person suited to their organisation. Support can include a trial placement before starting the job. If the placement is a good fit and the young person is hired, the employer may be eligible to receive a wage subsidy. See the website for more information.

National Work Experience Programme
employment.gov.au/national-work-experience-programme

The National Work Experience Programme places job seekers in real life unpaid work experience placements. It helps job seekers gain experience and confidence, while demonstrating skills to potential employers. Businesses may be eligible to receive an incentive payment for hosting a National Work Experience Programme candidate and, if participants are offered ongoing employment after the placement, businesses may also be eligible for a wage subsidy.

Disability Employment Services
www.jobaccess.gov.au

For job seekers with a disability, injury or health condition who need help to find or keep a job, Disability Employment Services can help. The JobAccess website also has comprehensive information to help job seekers understand their rights and responsibilities, find financial support for workplace modifications and help to find and keep a job.

A Disability Employment Services provider can help an employer to hire someone with a disability. They will also provide support to:
- Access financial assistance in the form of a wage subsidy to help with the costs of work-related modifications and services
- Provide post-placement support while the new employee settles in.

Community Development Program
niaa.gov.au

The Community Development Program can help job seekers in remote areas of Australia improve their workplace skills and employability. The support is tailored to the workforce needs of the area and helps contribute to the local community.

For businesses based in remote areas, the Community Development Program can offer financial incentives to manage the costs of employing remote job seekers. The program is designed around the unique social and labour market conditions found in remote Australia.

Australian Apprenticeships
australianapprenticeships.gov.au

Provides information on apprenticeships and traineeships, including factsheets and links. An Australian Apprenticeship offers job seekers the opportunity to explore a new job, gain new skills, work flexible hours and receive a qualification. Eligible employers can receive financial incentives to help take on an apprentice, particularly if the apprenticeship is in a trade experiencing a skill shortage. Visit the website for more information.

School Leavers Information Kit and School Leavers Information Service
yourcareer.gov.au
This kit has a range of resources and information to help school leavers understand their education, training and work options in 2021. For more tailored support or guidance, school leavers can call, text or email the School Leavers Information Service to talk to an information officer or careers practitioner.

Call 1800 CAREER (1800 227 337) or text ‘SLIS2020’ to 0429 009 435 to chat to someone who can help you. This is a free service, however, minimal call/text costs may apply. If you are deaf or have a hearing impairment and/or have a speech impairment, call 1300 555 727 (speak and listen) and ask for 1800 CAREER (1800 227 337) or go to the National Relay Service website for other options.

Job Outlook
joboutlook.gov.au
Job Outlook can help you make decisions about study and training, getting your first job, or the next step in your career. It provides information about Australian careers, labour market trends and employment projections. It also has a careers quiz to help you identify what type of work you most like doing, and the Skills Match tool which will show you jobs and careers that match your skill set.

Job Jumpstart
jobjumpstart.gov.au
The Job Jumpstart website is a one-stop-shop for practical, independent and free employment planning advice. The website offers information and resources for young people, to help them

• learn about the different ways to contact employers about jobs
• find out about the jobs and industries that might suit them
• understand how to develop their skills and build their experience
• learn how to make their job application stand out
• adjust to the workforce and understand their workplace rights and responsibilities.

What’s Next?
whatsnext.dese.gov.au
The What’s Next? website provides a range of online resources to help workers facing retrenchment to manage the transition to their next job as quickly as possible.

Information about tertiary education and training

Quality Indicators for Learning and Teaching
qilt.edu.au
Provides information about Australian universities, including study experiences and employment outcomes.

myskills
myskills.gov.au
An online database of Vocational Education and Training options, including information about providers, courses, outcomes and fees.

training.gov.au
Information on training packages, qualifications, courses, units of competency and Registered Training Organisations.

National Centre for Vocational Education Research
ncver.edu.au
Provides research and statistics about Vocational Education and Training and the links between education and the labour market.

myfuture
myfuture.edu.au
An online career exploration service which includes information on a range of career-related topics.

Understanding the labour market

National Skills Commission
nationalskillscommission.gov.au
The National Skills Commission provides data and insights on Australia’s labour market, workforce changes and identifies current and emerging skills needs. It routinely publishes information on a range of labour market issues such as the impacts of COVID-19 on businesses and identifying emerging occupations within Australia.

Labour Market Information Portal
lmip.gov.au
The National Skills Commission’s Labour Market Information Portal brings together data from a range of official sources to help you understand your local labour market.
Data Sources

**National Skills Commission**

- Survey of Employers’ Recruitment Experiences & Jobs in Demand Survey

**Australian Bureau of Statistics (ABS)**

- Labour Force, Australia, September 2020
- Labour Force, Australia, Detailed, August 2020
- Education and Work, May 2019
- Characteristics of Employment, Australia, August 2019
- Australian and New Zealand Standard Classification of Occupations
- Australian and New Zealand Standard Industrial Classification

Employment data at the national and state level are seasonally adjusted (where available). Due to the COVID-19 pandemic, the ABS has suspended the publication of trend estimates until the medium to long-term nature of the impact is understood. All other data are annual averages of original data.

Employment data at the regional level are 12 month averages of original data.

- Because of the different bases for these data, state and regional employment and employment change figures are not comparable.

Employment data for Industry and Occupation groups are ABS data seasonally adjusted by the National Skills Commission (where available) but all other employment data (such as employment profile figures) are annual averages of original data.

For many small occupations and regions, the standard errors are relatively large. Accordingly, employment data may exhibit considerable variation and should be used with caution.

Regional areas are defined as those outside Greater Sydney, Greater Melbourne, Greater Brisbane, Greater Adelaide, Greater Perth, Greater Hobart, Darwin and the Australian Capital Territory.

The ‘no post-school qualification’ figures are for employed persons who have not completed education other than pre-primary, primary or secondary education. The ‘other qualification’ figures include - vocational education and training certificate I, II and not further defined; level of education inadequately described; and level of education not stated.

**Department of Education, Skills and Employment**

- Higher Education Student Data Collections

Higher education data are for domestic student enrolments in universities.

**Quality Indicators for Learning and Teaching**

- 2019 Graduate Outcomes Survey

Undergraduate and postgraduate full-time employment outcomes are a proportion of those who were available for full-time work four months after completing their degree.

Overall employment outcomes are a proportion of those who were available for any work four months after completing their degree.

**National Centre for Vocational Education Research**

- Apprentice and Trainees, 2020 (March quarter)
- Total VET Students and Courses, 2019
- VET Student Outcomes, 2019

Vocational Education and Training graduate employment outcomes data are for all graduates who improved employment status after training. Vocational Education and Training student enrolment data are for individuals who were enrolled in a subject or program in 2019.

Some Vocational Education and Training student enrolment data relate to program enrolments (that is, study for a qualification course or skill set).
